## SUMMARY

Front-End developer experienced in building robust client facing applications with involvement throughout the entire software development lifecycle. My background in hospitality operations and SaaS sales has provided me with unique and valuable customer facing experience and perspective that I channel when solving the fun and complex problems involved with software development.

## TECHNICAL SKILLS

<b>Programming Languages</b>	JavaScript   TypeScript   Python
<b>Frameworks/Libraries</b>	React   Node   Express   Django   PostgreSQL   MobX   Redux
<b>Miscellaneous</b>	AWS   Sentry   Amplitude   Cypress   UI/UX Development

## CERTIFICATIONS

### Software Engineering Immersive

General Assembly

*Completed May 2021*

### Fundamentals of Project Management

University of Virginia – Darden School of Business

*Completed December 2021*

## EXPERIENCE

### DoorDash

**Mar 2022 to Dec 2022**

*Software Engineer*

- Developed frontend components and pages for a Typescript/React consumer site, alongside Python for a Django backend.
- Implemented tracking events via Amplitude/Segment to better understand user behavior, inefficiencies in the site, and increase conversion.
- Served as on-call engineer to assist our support team in troubleshooting and resolving any issues.
- Expanded end-to-end test coverage in both our consumer and merchant sites via Cypress.
- Performed and monitored overnight production deploy 1-2 times per month.

*Project: Order Now, Pay Later*

- Spec'ed, developed, tested, and shipped a complete overhaul of our in-store ordering product. Creating a seamless and simplified ordering/payment experience for users and increasing revenue for our customers.
- Primarily developed new frontend components and pages using TypeScript/React.
- Wrote data migrations and expanded upon existing endpoints using Python for a Django backend.
- Utilized dynamic value testing on a per restaurant and per user basis for project rollouts.
- Collaborated with project lead, design, product, support, and other key stakeholders to ensure the project met specifications and deadlines.

*Project: Group Ordering*

- Developed, tested, and shipped a mobile first React feature that allowed users to build an order collaboratively using their own devices.
- Primarily developed new frontend components using JavaScript/React.
- Pair programmed remotely with team members.
- Wrote unit tests in python to ensure stability of the new feature.

**Bbot (acquired by DoorDash)**

**Sep 2021 to Mar 2022**

*Software QA Engineer*

- Performed code reviews and manual testing of all pull requests ensuring standards were met and no regression to our core product.
- Managed bi-weekly production releases: merging PR's, manually testing our core product and new features in a deployed staging environment, approved production deploys, and wrote release notes for cross-functional teams.
- Created documentation on deploy procedures to create consistency/stability in our releases and enable new/existing team members to perform the process.
- Wrote unit and end-to-end automated tests.

**Professional Development**

**Sep 2020 to Sep 2021**

- Attended a full-time software engineering boot camp through General Assembly for 12 weeks. Built a solid foundation and understanding of JavaScript, Python, HTML/CSS, SQL, and general software development best practices.
- Collaborated with my cohort daily, which consisted of lecture, reading documentation, coding practices, pair programming, and four full stack projects.
- After completing the boot camp I continued to ramp up my skills and understanding through various online courses, side projects, reading documentation, and networking.

**Toast**

**Jan 2020 to Apr 2020\***

*Account Executive*

- Managed all SMB sales in NW Suburbs of Chicago for our full restaurant technology platform
- Conducted demos and developed solutions that best met restaurateurs' needs in a teach, tailor, and take control sales methodology.
- \*Position was eliminated due to COVID-19's early impact on the restaurant industry.

**Topgolf Entertainment Group**

**Jun 2016 to Dec 2019**

*Jr. Product Manager, Topgolf Live*

*Jul 2019 to Dec 2019*

- Planned, coordinated, built, and executed experiential partnership activations at professional sports stadiums for ~5,000 guests across the country.

*Venue Operations Manager*

*Aug 2018 to Dec 2019*

- Led multiple teams of 40+ associates and a venue of 300+ associates in day to day operations delivering best-in-class service with hospitality; in a venue seeing ~175K guests annually and grossing ~\$9M.

*Training Consultant, Venue Operations*

*Jan 2018 to Aug 2018*

- Facilitated the implementation of a technology and steps-of-service enhancement to all U.S. Topgolf venues. Establishing a consistency for Topgolf to build their brand upon, the brand we all see today.

*Venue Operations Team Lead*

*Jun 2016 to Jan 2018*

- Led a team of 50+ associates in managing events, reservations, and walk-in flow. Ensuring all patrons have a memorable and seamless experience while maximizing efficiency for our business; in a venue which would see ~350K guests annually grossing \$18M.
